DATA CENTER & SERVER ROOM CLEANING PARTNERSHIP

BioFresh Pure Cleaning | Antistatic Precision Cleaning | WBE Certified

BioFresh Pure Cleaning is the Southeast's trusted specialist for data center and server room cleaning — using precision antistatic protocols that protect your critical infrastructure, eliminate downtime risk, and keep your facility audit-ready.

THE DATA CENTER CLEANING RISK

Standard cleaning crews are a threat to your data center. Here's why BioFresh is different:

■■ Standard Vacuum = ESD Risk

Regular vacuums generate static electricity that can instantly destroy sensitive components worth millions.

■■ Wrong Products = Moisture Damage

Standard cleaning chemicals introduce moisture that causes corrosion, shorts, and equipment failure.

■■ Unvetted Staff = Security Risk

General cleaning crews lack background checks required for secure, sensitive data environments.

■■ Dust = Overheating

Unchecked dust buildup on servers causes thermal throttling, reduced lifespan, and unplanned downtime.
